Myths About Stem Cell Therapies You Shouldn't Believe

Myth #1, stem cell treatments are only good for healing injuries. Truth, stem cell treatment are good for old and new injuries, but it doesn't stop there. Patients who have chronic joint pain, arthritis, degenerative disc disease, back or neck pain that originates from the spine and tendonitis can all benefit from a stem cell injection...

Do You Know The Difference In These Therapies?

Our office has been utilizing the regenerating healing properties of two similar, but different, injections. Platelet Rich Plasma Injections "PRP" and Bone Marrow Aspirate Concentrate "BMAC." Both injections use the patient's own blood to help heal and reduce chronic pain, but do you know the difference...
